

MARGIT VIIGI

FULL-STACK DEVELOPER TO-BE

EDUCATION

- **Junior software developer** 2024-
Tartu Vocational College
Just finished my first year. Other than programming, I also learned project management, web design, databases, communication, digital technology, testing and more.
- **Radiographer** 2019 - 2023
Tartu Applied Health Sciences University
I still carry first aid kit and can name every bone and organ in human body in Estonian, English and Latin. I am also trained to recognize medical emergencies .
- **High school - specialized in art** 2011- 2014
Tartu Kunstigümnaasium
I can draw pretty well and it translates in my current career path as being decent at web design.

I am a former radiographer currently retraining as a software developer at Tartu Vocational College; looking forward to starting my first job after career turn.

SKILLS

WORK EXPERIENCE

- **Radiographer** 2019 - 2023
Tartu Ülikooli Kliinikum
That makes me a good candidate because I
 - developed resilience in a high-stress work environment;
 - learned communication in difficult situations;
 - have tech background, in a way, as I used different databases and several very specific software solutions daily;
 - will never take friendly, safe and considerate workplace for granted.
